## **HERCULES CAR WASH SYSTEM**

It is not very often that you purchase a product and find it to be everything that you thought you purchased and more!!

We have had "arm" type car wash machines in the past that required constant maintenance and upkeep not to mention damage from time to time. Being a 100% touchless car wash from Hercules we now say good bye to wash related damage.

Our machine is located directly in front of our customers, to put this machine in an area that customers cannot see it function would be a great mistake. Our customers constantly compliment us on how the machine works and watching the Seal Coat is the "WOW" factor we all wish we could get. The car transforms into a glossy shine when the Seal is applied.

Being in Brooklyn EVERY Square Foot Counts and the fact that this system does not take physical footprint goes a long way in my building. It's compact and retracts into itself so when not in use it does not take up space!

We service over 300 cars per day and sell 1200 New and Used cars a month. The manpower savings were more than I expected.

If I had to do it again, I would choose this solution over and over and over again.
